## SKILLS

---

Languages: Proficient in Python, Java; Some knowledge in HTML5, CSS3, JavaScript  
Other: Proficient in Word, Excel, PowerPoint, etc.

## PROJECTS

---

### AI-Snake

- A team-based project that attempts to develop a machine learning based algorithm that can play the game Snake.
- Utilizes python and TensorFlow to develop the algorithm

### Personal Website: [jamescuaderes.github.io](http://jamescuaderes.github.io)

- A personal website I developed myself using HTML5, CSS3, and JavaScript
- Not completely finished as I make improvements here and there in my spare time

## ORGANIZATIONS

---

### Aggie Coding Club

- A student organization devoted to developing programming skills
- Teaches members the importance of teamwork and communication through group projects

### MSC Aggie Leaders of Tomorrow

- A Freshman Leadership Organization (FLO) on campus devoted to molding young freshman into involved student leaders
- Entry to this organization is competitive, requiring an extended application and interview process
